In mid-1953, component parts for control units were developed at Laboratory No. 1 of the TRG Department, ship radio sets at Laboratory No. 2, and ground radio equipment at Laboratory No. 3. Among other equipments, indicators were under development for a Dacca type receiver, and the synchronizing mechanism and the antenna for an anti-collision set. Soviet Army circles and the RVN were greatly interested in an automatic score recording device for firing ranges.
